

JOFAMA

Halvarssons

ONE FAMILY. THREE BRANDS.

Halvarssons

Halvarssons has been around for 70 years. Based on a firm foundation of craftsmanship, it's clothes have continued to develop as leather and textile technology have advanced. Halvarssons have only the very best qualities and characteristics. We put our all into developing garments that are extremely safe and comfortable. Among the many testimonials to our success are Swedish, British and Czech police forces, all of whom wear our gear. Halvarssons makes stylish clothes with a classic appearance that last for years in terms of both quality and safety.

Lindstrands makes the clothes for people who like to stand out and live life to the full. With an extensive range and modern features that do not compromise on safety, Lindstrands' epic ride continues into its second century. Lindstrands began making motorcycle boots back in the 1950s, and their products have only got better since. This is the brand for people who relish adventure and who dare to go the extra mile.

JOFAMA

When Niss Oskar Jonsson founded Jofama in 1926, he could never in his wildest dreams have foreseen the technological advances to come. But even back then, the focus was on craftsmanship, tradition and quality – things that still characterise the entire product line today. Jofama makes functional, reasonably priced bike wear whose classic style never goes out of fashion.

WE ARE READY.

A motorcyclist's personal protective equipment falls under an EU requirement; a requirement that products stating they give the user some form of protection must be tested and certified by an accredited laboratory which also issues a CE certificate for the product. If the product only provides protection against weather such as rain and wind, it does not need to be tested and certified. The certification process includes mechanical tests (material, seams and protection), together with chemical analysis of the materials included in the product.

The importer to the EU or the distributor to the market are responsible for ensuring that products brought into the EU or placed on the market are tested and certified. Through the brands Jofama, Halvarssons and Lindstrands, Jofama has long developed products which have been tested and are thereby CE marked.

Today there are standards for the following product groups:

EN 1621-1 CE standard for impact protection (shoulders, elbows, hips and knees).

EN 1621-2 CE standard for back protection.

EN 1621-3 CE standard for chest protection.

EN 1621-4 CE standard for inflatable protection.

EN 13595 CE standard for motorcycle gloves.

EN 13634 CE standard for motorcycle footwear.

EN 14021 CE standard to protect riders against stones and debris (off-road motorcycling).

EN 17092 CE standard for protective clothing for "private individuals". (Under development, publication expected in 2019).

Our new products for 2017, 2018 and 2019 are ready to fulfill the requirements in the EN 17092 standard for clothing.

In some standards, the level of protection is stated. "Level 1" indicates the lowest level of protection, and "Level 2" the highest level of protection. This must also be stated on these products.

Products that have undergone testing and certification for motorcycle use must be CE marked. Read more at www.jofama.se

BENEATH THE SURFACE.

ARMOUR

Garments that use armour have Velcro sewn into them to keep the armour in place and for ease of adjustment.

AIR MESH

We often use Air Mesh behind armour for better comfort.

LINING

Closest to the body is a lining, sewn-in or removable. Usually made from ventilated mesh, temperature-regulating Outlast® or a warm, quilted lining.

HI-ART

This is where HI-ART® is located in our garments. Our proprietary material makes garments incredibly resistant to wear, and is used in most of our products.

SFAMS

We choose thread to suit the material to make seams as strong as possible. We use Triple Stitch in vulnerable areas of our leather wear.

OUTER FABRIC

The outer fabric is leather or textile with various types of surface treatment.

MEMBRANE

Some garments also have a sewn-in or removable membrane. Taped seams, naturally.

SIZE AND FIT.

Looking good and feeling comfortable on the road demands the right size clothes. What many forget is that a good fit is also important for safety. Because it's essential for protectors to be positioned correctly, we make adjustments possible by attaching protection with Velcro. Also, remember to try on the garments together with the clothes you usually wear when riding your MC. And don't be afraid to ask our personnel for help. The best way to find the right size is to visit one of our dealers. They'll help you find the right fit when you need new equipment. You can also see our size guide at page 30-31. You can locate our dealers at www.jofama.se

EXPERT TAILORING.

When we make our clothes we also make them in many special sizes in order for them to fit as many body types as possible. If you don't find a garment that fits you perfectly, why not visit our Alterations Studio. We'll help you get your clothes to fit as perfectly as possible. We can also take care of clothes that are ripped or have suffered some other kind of damage.

CARE INSTRUCTIONS.

Coming in from the rain - Let wet garments dry slowly at room temperature. Leather garments should not be dried at too high a temperature and never in an airing cupboard or on a radiator as this will make garments stiff and hard.

Leather garments – Leather garments must never dry out completely. Because dry leather fibres break easily under stress such as an accident, treat leather regularly with e.g. Nikwax Waterproof Wax for Leather so that it retains its natural elasticity. Use a mild soap solution or leather soap such as Nikwax Leather Cleaner two or three times a year to ensure garments last year in, year out. Always test it first somewhere that doesn't show e.g. inside.

Textile garments – To keep textile garments clean, wash them according to their washing instructions; we recommend the use of Nikwax Tech Wash. But don't forget to remove the armour. You should waterproof outer garments often, preferably every three washes. Use Nikwax TX Direct for functional clothing.

Halvarssons

TOP QUALITY, PRACTICAL AND THE JOY OF RIDING

Halvarssons has been making safe bike wear for the Scandinavian climate for 70 years. The clothes undergo constant development and our goal has always been to provide assurance, safety and comfort to riders. Halvarssons excels in every little detail. This is true of every product in our extensive range that includes every-thing from leather jackets to gloves. The weather in Scandinavia is capricious – a warm sunny day can turn wet and chilly in an instant, so it's important that clothes work well in every weather.

Light, supple and quick-drying clothes in a unique material that provides the highest level of comfort come heatwave or torrential rain.

A NEW BENCHMARK IN FUNCTIONAL WEAR

WIEN & WIEN LADY Never standing still, the new Wein and Wein Lady technical textile jackets set a new benchmark in functional wear. The new removable Outlast temperature regulating lining combined with Innoborn insulation, a material warmer than wool and having moisture transporting properties can be worn separately making it the ideal travelling companion. Our latest Dryway 2.0 functional membrane, DWR (Durable water repellent) treatment to the outer material and removable collar takes care of the worst the weather can offer while stretch panels, ventilation openings and multiple adjustment possibilities maximise comfort. Reassurance of our HiArt high abrasion resistant material in key areas, adjustable level 2 armour, reflecting panels and the option for our adjustable level 2 back protector, all backed up with a CE certification meeting class "AA" means vou're left with only enjoying your ride.

W PANTS Constructed using a functional, flexible fabric, Dryway 2.0 membrane. DWR (Durable Water Repellent) treatment to the outer fabric and Outlast with Innoborn temperature regulating removable thermal lining these trousers make the perfect companion to the Wein jacket. Ventilation openings, stretch panels, several adjustment possibilities and different leg length options maximise comfort and fit while the HiArt high abrasion resistant material, adjustable level 2 protectors to the knees and hips keep you feeling safe. Long leg zips for easy entry and exit, removable braces and connecting zip for jackets complete the package. Certified to class "AA".

Light, flexible garment in unique materials that provide the highest levels of comfort, mobility and protection.

FUNCTIONAL WITH THE MOST UP TO DATE TECHNOLOGY.

CELTIC & CAMBRIDGEA real classic jacket made from the finest cowhide but with the most up to date technology. With the latest Dryway 2.0 functional membrane and Outlast temperature regulating lining, these jackets are ready for the worst. And when the summer arrives the TFL treatment will trick the sun into thinking the jacket is white and reflect the heat, keeping you comfortable and cool. Ventilation openings further ad to the comfort in hot weather. No need to worry about safety. With HiArt high abrasion resistant material to the elbows and shoulders, level 2 armour, adjustable of course for the perfect fit no matter what shape you body, facility to add a back protector which can also be adjusted and a CE certificate to the highest "AAA" level, we think we've got you covered.

C-PANTS A soft comfortable pant in the cowhide with a Dryway 2.0 functional membrane, temperature regulating Outlast lining to keep you both warm and cool, TFL treatment for reflecting the suns heat, and ventilation openings at the thigh, this pant is designed for riding. Pre-curved legs and adjustable level 2 armour make them comfortable from day one and the large back zip opening make them easy to use. HiArt high abrasion material in key areas and a CE certification to the highest level "AAA" should mean your safe should the worst happen.

FOR THE ADVENTUROUS TRAVELLER

OMAN JACKET A multifunctional textile jacket designed to be used across the globe in every environment. The latest Dryway 2.0 membrane and DWR (Durable Water Repellent) treatment to the outer shell keeps you dry while the removable thermal vest with moisture wicking Innoborn filling and detachable neck collar are sure to keep you warm. When the temperature soars the possibility to quickly remove both linings combined with large chest vents and open rear vent leaves you feeling comfortable. Comfort is further enhanced with multiple adjusters and stretch panels. Compromising safety should never be an option and the reassurance of a CE certification to class "AA", adjustable limb protectors, HI-ART high abrasion resistant material to key areas, reflecting panels and option to add an adjustable back protector leave you in no doubt. Multiple pockets complete the look and functionality making the Oman jacket the choice for people with true adventure spirit.

OMAN PANTS The garment for those who want a comfortable pant for all conditions and environments. The DWR (Durable Water Repellent) treatment to the outer material, functional Dryway 2.0 membrane and removable thermal lining with Innoborn filling take care of cold climates while large leg ventilation openings keep you cool when the linings are removed. Comfort and safety is never compromised with multiple stretch panels, adjustable CE level 2 protectors to the knees and hips and HI-ARTabrasion resistant material in key areas backed up with a class "AA" CE certification. Large easily accessible pockets complete the look and practicality for the adventurous traveller.

JOFAMA

TEXTILE WITH DRYWAY FUNCTION.

NEPTUNE New for 2019 the Neptune and Neptune Lady textile iacket for those who want basic functions without compromising on quality and safety. Whether you're riding in the heat of summer or a chilly autumn evening, these jackets will keep you comfortable with their Dryway functional membrane, removable thermal lining and venting at the rear. Adjustable hem, cuffs and arms combined with Jofama's unique adjustable armour give the best possible fit for the widest range of shape and sizes. An all round zip to connect to trousers and option to add our level 2 back protector complete the jacket making it a wise choice for anyone looking for a simple style with traditional quality. And with the reassurance of CE certification to level "AA" you can be sure no compromise has been made on safety.

NEP PANTS

All motorcyclists need a good riding trouser that fits well and is easy to wear. The new Nep pants with its Dryway membrane easily fulfil these task and still leave you money to buy fuel. For cooler days there is a thermal lining and when the weather turns kind, the lining can be quickly and easily removed and the conveniently placed vents opened. Further enhancing the comfort there is elastic stretch panels at the knee, CE level 1 armour that can be adjusted for the perfect fit and different leg length options to suit all sizes. Certified to CE level "AA" for your safety.

USE LAYERS OF CLOTHING FOR THE GREATEST COMFORT

To get the best out of functional clothing, it is important to dress properly from the body outwards. We recommend using the layer principle.

LAYER 1

You should wear polyester or wool closest to the body, or wool with Outlast®. It wicks away moisture and will keep you warm and dry. Avoid cotton as it absorbs moisture and will cool you down. Our underwear is also available in ventilated mesh for hot weather and in a range of wool weights and Windstopper for those really cold days.

LAYER 2

Because the intermediate layer should insulate and regulate temperature, use fleece, polyester or wool. Avoid cotton here, too. We recommend a garment that balances temperature and counteracts sweating. In really warm weather, you can skip the intermediate laver.

LAYER 3

This layer protects you from wind and water while completing the wicking of moisture away from the body. We recommend jackets and pants that use membranes.

LAYER 4

In the most extreme wet and cold conditions, consider adding a fourth outer shell to protect from wind chill or wetting out of products. Once a jacket becomes wet on the outside, heat is lost quickly and the effects of wind chill become greater even when still dry on the inside. Use our WP jacket and trousers or WP suit as a perfect fourth layer. Add covers for gloves and footwear.

CLOTHES MADE FROM THE RIGHT STUFF.

When we create new gear we set ourselves high standards. Our secret recipe for success is a century of craftsmanship blended with high technology. The result is motorcycle gear that's far ahead of the pack. Just ask the motorcycle police in Sweden, England and the Czech Republic or any of the professional motorcyclists who wear our gear on a daily basis. In this section you can read all about the techniques and methods we use to keep you safe and comfortable on the road.

HI-ARTΩ

HI-ART® is a proprietary material developed by us. We use the material in especially vulnerable areas to increase abrasion resistance. It makes leather 200 per cent stronger and textiles no less than 500 per cent stronger. You can compare the material to cutting a piece of wood; it's much easier to cut across the grain than with it. We are extremely proud of our invention and being alone in offering the market this solution.

This is a wind and waterproof membrane that keeps you dry even in the wettest, windiest weather. The material allows moisture to escape from the inside of the jacket while keeping wind and rain out.

We add a new level to our own functional membrane with a waterproofing value of 10,000mm and \$\approx 30,000g/m2/24h\$ breathability value. Found in some of our latest garments from Halvarssons and Lindstrands to yet further improve their performance. Keep in mind that a membranes function relies upon the difference in humidity between the inside and outside. If an external heat source is applied such as heated grips or seats, the membrane will work in reverse.

An extra water repellent treatment on some of our textile nand-leather products providing additional comfort to the user. Garments treated with a DWR will shed water more efficiently, retain their breathability properties and dry faster while also being easier to keep clean.

A garment is never stronger than its seams. It makes no difference how good the material is if the seams split, so we take our seams very seriously indeed. Following a multitude of tests we have found a technique that provides maximum durability. We use a well-balanced stitch density; heavy-duty, hard-wearing thread with three seams in vulnerable areas, all the correct distance apart to sew our garments together.

Outlast® is a high-tech material that evens out temperatures inside a garment. While it was originally developed to protect astronauts against extreme temperature differences, the material works just as well in bike wear. The lining consists of millions of microscopic paraffin wax capsules that absorb, store and release excess heat to keep the wearer feeling comfortable out on the road. Read more at outlast.com

Maximum Comfort FIT technology in gloves laminates the liner and membrane with the outer shell for a perfect fit and prevents the liner from following the hand when removed.

SKIN FIT

A technology used to secure glove linings. Where used the lining will remain firmly attached and avoid being pulled away after a period of time.

Treating a garment with Teflon keeps the wearer dry and feeling fresh longer. The treatment keeps water and dirt away, and also allows a garment to dry quicker. Read more at teflon.com

TFL COOL SYSTEM®

Black leather is commonly used in bike wear. Trouble is, it gets pretty hot in the sun. Unless you use TFL Cool System - an innovation that ensures black leather does not absorb more heat than brighter materials. Once it has been treated, 80 per cent of the heat radiation is reflected away and the garment can be up to 20° C cooler. Read more at tfl.com

An insulating material capable of retaining heat longer than even wool yet is light weight, quick drying and transports moisture efficiently away from the body. Consist of 100% Olefin / Polypropylene. Can be found in our latest textile garments from Halvarssons and Lindstrands.

Sometimes warm clothes can feel awkward and bulky. but thanks to Thinsulate our garments are light and supple, while also keeping the wearer warm. The secret behind the material is in the unique microfibres that warm up the air

The CE label shows that the product complies with an approved safety standard based on advanced testing and accident studies. Further details at www.jofama.se

If a jacket bears this symbol it has a pocket ready for our CE-approved SECURE L2 and HUNTLEY back protector.

This product is pre-fitted with Velcro and can be complemented with a complete protection kit for jacket or pants. The CE-approved protectors come in two sizes.

The product has CE-approved protection level 1 and Velcro fasteners for easy adjustment. Jackets have shoulder and elbow armour. Pants have hip and knee armour.

This product has armour that achieves Level 2, the highest level according to EN 1621-1:2012. Velcro attachments for personal fit. Jackets have shoulder and elbow armour. Pants have hip and knee armour. Elbow and knee armour is designed to provide more protection on the outside.
